

A progressive medical group,
planning for the future,
focused on strategic growth.

That's PriMED

About PriMED Physicians

Our mission is to be a compassionate team, providing exceptional care by simply doing what's right for patients.

The group practice includes doctors, nurse practitioners, nurses, medical assistants and receptionists who share a commitment to providing the best care for our patients.

- **Family Practice**
- **Internal Medicine**
- **Pediatrics**
- **Neurology**
- **Clinical Research**

We work with
area providers
and hospital
systems to offer
coordinated care.

Treating **You** Well.®

Serving Greater Dayton/Miami Valley since 1995.

PriMED Offers:

PriMED Physicians is an independent, physician-owned medical group focused on helping you and your family enjoy a healthy life - at every stage of life.

We offer primary care and advanced specialized care in internal medicine and neurology. And because our multi-speciality practices are conveniently located throughout the Miami Valley, we're making great healthcare more accessible than ever before.

Why PriMED?

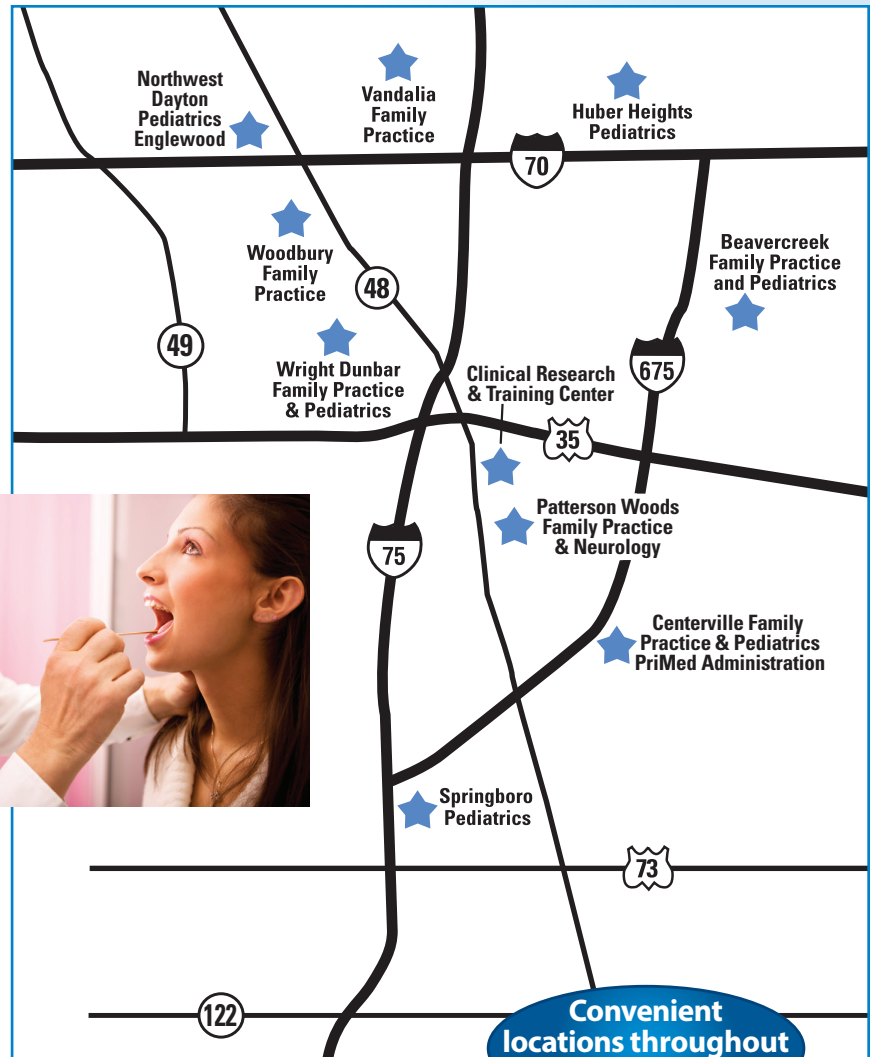

1. Your satisfaction is the foundation of our success.
2. Our compassionate team is focused on building a relationship with you, our patient.
3. Over two decades of caring for patients.
4. As an independent medical group, we are free to explore new and better ways to deliver healthcare.
5. We are transforming how healthcare is delivered.
6. Our care-team approach puts you at the center of your own healthcare universe.

Focused on Quality

PriMED focuses on quality that is supported by evidence-based medicine. In treating chronic conditions, our patients have exceptional outcomes:

- PriMED has led the nation in hypertension outcomes: achieving as high as 93% success for hypertensive patients, based on the NIH JNC-7 criteria. Our top scores were recognized in CDC's Million Heart Campaign and AMGA's Measure Up, Pressure Down.
- PriMED has also led the nation in diabetes outcomes, being recognized as a top performer in AMGA's 2018 Together2Goal.
- The National Committee for Quality Assurance (NCQA) has recognized PriMED for Patient Centered Medical Home, the Heart/Stroke Recognition Program and the Diabetes Recognition Program.
- PriMED was selected for the Comprehensive Primary Care pilot from CMS, to test a model of improved access to quality healthcare at lower costs. Now that the pilot has migrated to a statewide program as CPC+, PriMED is again fully participating in this program to address the Triple Aim.
