

Welcome to **PriMED**

PriMed Physicians offers exceptional primary care throughout the Miami Valley.

We are a team of doctors, advance practice providers, nurses, medical assistants and receptionists who share a commitment to providing the best care, by simply doing what's right for our patients.

As healthcare undergoes many changes, PriMed is ahead of the curve with approaches and solutions to today's challenges.

Who is PriMED?

Since 1995, PriMed has been an independent medical group. We are not affiliated or owned by any hospital system. We continue to be in-network for most health plans.

We have been recognized as a national leader in managing chronic conditions, such as high blood pressure and diabetes. At PriMED, that's achieved by working together to identify and follow the best processes in medicine. This process-driven approach is built on evidence-based, clinical standards of care.
