

Can't sleep? We can help!

Do you want to function on FULL? The secret is a good night's sleep. At CT Sleep Center, our dentists will provide a thorough assessment along with a personalized treatment plan.

Dentists are at the frontline in recognizing and treating sleep apnea. Signs of sleep apnea can present in the oral cavity and anatomy. Your dentist will screen you for sleep breathing disorders and if a diagnosis is made, they will work along side other medical professionals to provide you with a customizable treatment plan. This may include the fabrication of an oral appliance.

Do you experience daytime sleepiness?

Do you snore?

Fall asleep easily?

Suffer from insomnia?

Experience chronic stress/anxiety?

Experience jaw pain?

Have frequent headaches/migraines?
